

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

U.S. PATENT APPLICATION NO. 10/506,856
FILING DATE 2 September 2004
INVENTOR John D. Bambara
ASSIGNEE Cellect Plastics LLC
ART UNIT 1771
EXAMINER Victor S. Chang
ATTORNEY'S DOCKET NO. 41794.0074
TITLE "Polypropylene Foam and Foam Core Structure"

INFORMATION DISCLOSURE STATEMENT

To: Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

From: Scott C. Nielson
HOLLAND & HART LLP
P.O. Box 11583
Salt Lake City, Utah 84147-0583
Telephone: (801) 799-5858
Facsimile: (801) 799-5700

Submitted herewith on Form PTO/SB/08 is a listing of documents in order to comply with Applicants' duty of disclosure pursuant to 37 CFR §1.56. A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §§ 1.97 and 1.98. All listed documents are requested to be considered by the Examiner and made of record in the present application and that an initialed copy of Form PTO/SB/08 be returned in accordance with MPEP §609.

The submission of any document or statement herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING

The listed documents are being submitted in compliance with 37 CFR §1.97(c), before the mailing date of any of a final action under § 1.113, a notice of allowance under § 1.322, or an action that otherwise closes prosecution of the application.

RELEVANCE OF EACH DOCUMENT

An English abstract for EP 0 700 939 states: "Expanded polypropylene (EPP) particles with a density of 10-150 d/l and dia. of 2-10mm are based on a gel-free and partly crosslinked polymer (I) of more than 50 wt.% propylene and the polymer chains are linked by polyfunctional organic cpds. (II). Also claimed is a method for making the EPP particles."

An English abstract for EP 0 601 455 states: "A polypropylene molding composition containing from 99.5 to 99.999% by weight of homopolymer or copolymer of propylene having a MFI 230/2.16 of from 2.0 to 25 g/10 min and from 0.01 to 0.5% by weight of a fluorine-containing thermoplastic polymer having a fluorine content of at least 50% and a melting point of below 250°C makes it possible to produce high-quality polypropylene films by the calandering method. The addition of fluoropolymers is not only more effective with respect to the release effect, but also gives significantly less deposits and causes an improved take-off behavior compared with the use of conventional lubricants."

An English abstract for EP 0 470 380 states: "A polypropylene molding composition which essentially comprises a syndiotactic propylene polymer and an ethylene/propylene copolymer rubber having a glass transition temperature of below -30 DEG C is distinguished by low hardness, rubber-elastic behavior and high impact strength."

FEES

Applicants will pay the required fee as part of the electronic filing process for submission of this information disclosure statement pursuant to 37 C.F.R. § 1.97(c).

The Commissioner is hereby authorized to charge payment of any applicable fees or credit any overpayment to Deposit Account No. 08-2623.

Respectfully submitted,

Date 10 August 2007 By /Scott C. Nielson/

*EXAMINER: Initial if reference considered, whether or not citation is in conformance with MPEP 609. Draw line through citation if not in conformance and not considered. Include copy of this form with next communication to applicant. ¹Applicant's unique citation designation number (optional). ²See Keys Codes of USPTO Patent Documents at www.uspto.gov or MPEP 901.04, "Enter Office that issued the document, by the two-letter code (WIPO Standard ST.3)." For Japanese patent documents, the indication of the year of the reign of the Emperor must precede the number of the patent document. ³Kind of document by the appropriate symbols as indicated on the document under WIPO Standard ST. 16 if possible.

⁴Applicant is to place a check mark here if English language Translation is attached.

This collection of information is required by 37 CFR 1.97 and 1.98. The information required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing this form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.
